## About Me

Enthusiastic first-year BTech student at SRM University AP, specializing in web development using HTML, CSS, and JavaScript. I am passionate about learning and expanding my technical skills, participating in hackathons, and gaining practical experience in coding and development.

---

## Technical Skills

- **Web Development:** Skilled in HTML, CSS, and JavaScript for responsive website design.
  - **Programming Languages:** Basic knowledge of Java, C, and Python, currently advancing skills.
  - **Tools & Technologies:** Familiar with Git for version control, and Visual Studio Code for development.
  - **Hackathon Experience:** Collaborative coding with teams using Git and GitHub.
- 

## Objective

To leverage my foundational knowledge in Web development and programming languages as I pursue a B.Tech degree at SRM University AP. I aim to expand my technical skills through practical projects, hackathons, and collaborative learning opportunities while contributing to innovative solutions in technology.

---

## Projects & Hackathons

Projects: Blue Shield Initiative, Actively involved in Hackathons

---

## Interests

- **Web Development:** Passionate about creating dynamic, responsive websites using web technologies.
  - **Blockchain:** Exploring decentralized applications and the potential of blockchain technology for secure systems.
  - **Marketing:** Interested in learning digital marketing strategies and understanding how to promote products and services effectively.
- 

## Languages

English, Hindi, Odia
